

MADRONA WOODS TRAILS

NATURAL AREA & COVE

Trails in green have been approved as part of a city-required plan for the 20-year-long Madrona Woods restoration. Trails in red have been created illegally.

Please use only the green trails. The red ones involved removing many native plants and creating areas which no longer provide diversity and good habitat for animals. Also using these trails compacts the soil, which can damage tree roots and inhibit new plant growth.
